

## 2. Build features creators LOVE (that OnlyFans is too slow to add)

Creators constantly complain about:

- Slow payouts
- Bad discovery
- No built-in AI tools
- High platform fees
- Shadowbanning
- No CRM features
- No mass messaging automation
- No built-in funnels
- No link-in-bio replacements

If Faniko builds features like:

### **AI auto-DMs + mass-messaging**

Creators pay for this.

### **Built-in free preview feed**

Makes creators grow faster.

### **Better analytics than OF/Fansly**

Retention = money.

### **Creator referral system**

You grow FOR FREE.

### **Embedded “Tinder-mode” discovery for fans**

This is crazy effective and nobody has done it properly yet.

**This is how you win market share.**

---

### 🔥 3. Lower platform fee (20% → 10–15%)

Creators will switch instantly.

Creators hate losing 20% to OF.

If Faniko:

- Takes 12–15%
- Offers FAST payouts (1–2 days)
- Gives creators more control

→ You steal creators immediately.

---

### 🔥 4. Allow BOTH SFW & NSFW creators

This is powerful.

Why?

Most platforms are ONLY NSFW.

Instagram/TikTok are ONLY SFW.

There is no middle.

Faniko can be:

- A mainstream creator monetization platform
- That *also* allows adult creators
- But not marketed as “porn only”

This gives you:

- Larger audience
  - Better payment processor options
  - Less stigma
  - Stronger brand
  - Freedom to pivot
- 

## 🔥 5. Focus on payments + global accessibility

OF, Fansly, and Fanvue have issues with:

- Banks
- Visa rules
- High-risk processors
- Country bans
- Payout limits

If Faniko:

- Supports crypto payouts
- Supports global payments
- Uses multiple processors
- Offers automated tax forms
- Pays daily/weekly

➡ Creators will flock to you.

---

## 6. Build a FAR better UI than competitors

Most adult platforms look old and clunky.

If Faniko feels like:

- TikTok
- Discord
- Instagram
- Shopify (clean UI)

Creators will want to move.

---

## 7. Build trust by verifying creators fast

Creators HATE waiting 48hrs for verification.

Offer:

- Instant verification
- Automated ID checks
- Simple onboarding flow

You lower friction → More sign-ups.

---

## Short version

Faniko can scale by:

- ✓ Entering the NSFW-friendly creator economy
  - ✓ Building better tools than the competition
  - ✓ Taking less %
  - ✓ Being faster, cleaner, and more creator-friendly
  - ✓ Focusing on a niche
  - ✓ Making payouts fast
  - ✓ Allowing SFW + NSFW instead of only NSFW
- 

## If you want, I can help you build:

- UX/UI flow
- Monetization model
- Creator sign-up process
- Onboarding funnel
- DM automation
- Pricing pages
- Discovery feed
- Fan subscription logic
- PPV system
- Creator dashboard
- Database models
- Full business plan
- Go-to-market strategy
- Pitch deck

Now that you have routing and two screens, here's what to build next — in order:

Stage	Feature	Purpose
✓ Stage 1	<a href="#">Routing, Home, Creator Signup</a>	done
🚧 Stage 2	<a href="#">Creator registration form</a>	collect email, username, upload ID (manual for now)
🚧 Stage 3	<a href="#">Login/auth system</a>	use Supabase or Clerk for quick setup
🚧 Stage 4	<a href="#">Creator dashboard</a>	basic analytics + content upload mock
🚧 Stage 5	<a href="#">Viewer explore page</a>	list of creators with profiles
🚧 Stage 6	<a href="#">Payments</a>	integrate Stripe or crypto payout flow
🚧 Stage 7	<a href="#">Moderation tools &amp; admin panel</a>	prevent spam, verify accounts
